Re: Testimonial of the SilverStream Solution.

Dear Mr. Alon Raivit.

Dear SilverStream Medical Team,

It gives me a great pleasure to express my sincere appreciation for the significant impact that SilverStream has had on my orthopedic practice.

With extensive experience in numerous of orthopedic surgeries in both public and private hospitals abroad and in Israel, I have encountered various post-surgery Surgical Site Infections (SSI) and challenging wounds that often resist conventional treatments

Over the years, the rise in cases of non-healing wounds, coupled with increasing bacterial resistance to antibiotics, posed a significant challenge. However, working with SilverStream solutions has elevated my practice performance, offering not only a swift recovery for patients but also the convenience of at-home use.

In my orthopedic clinic, patients with diverse wounds, including post-surgical orthopedic wounds, diabetic, Bullous Erysipelas, and others, have sought treatment after unsuccessful experiences with other topicals and devices. SilverStream has been a game-changer, demonstrating unparalleled versatility and remarkable speed in healing, inflammation reduction (as edema and erythema), bioburden removal, odor elimination, and pain relief. The Solution's ability to expedite the healing process without the need for surgical debridement has been particularly noteworthy, contributing to an enhanced quality of life for our patients.

What distinguishes SilverStream is its unique capacity not only to treat wounds but also to facilitate simultaneous healing. From chronic non-healing foot infections to post-surgery scenarios, the Solution has consistently proven its effectiveness against biofilm and necrotic tissue.

A standout feature is the Solution's compatibility with homecare, providing patients with a proactive and empowered approach to managing their treatment independently. Safe for healthy tissue and complemented by straightforward instructions, SilverStream

significantly reduces the need for frequent clinic visits, offering our patients a sense of control over their healing journey.

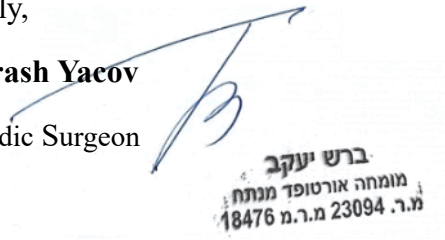

From a practical and economic standpoint, the cost-effectiveness of SilverStream is invaluable. It serves as an all-in-one solution, eliminating, in most cases, the necessity for additional products, hence reducing the overall treatment costs. This is only emphasized when re-surgery is prevented thanks to the unique SilverStream clinical benefits.

In conclusion, SilverStream has become an integral and indispensable part of my practice, simplifying and enhancing orthopedic procedure outcomes.

Sincerely,

Dr. Barash Yacov

Orthopedic Surgeon
